ENCLOSURE 6

TOWN CENTRE WORKING GROUP UPDATE

JULY 2022

The Group have not had a meeting recently but are pleased to report that the furnishing of Station Road has continued with the planters replanted and a pleasure to look at .

Further the decoration of the seating has started and the atmosphere improved.

We continue with our consideration of the paving of Station Road in the event of the current closure becoming permanent. We would hope if the Council agrees to consult with WCC officers as to the paving of the closed area and the footway part in Warwick Road and as to the funding of that work and the possibility of part of the adjoining road becoming a mixed pedestrian / vehicle area.

Further the Boots wall in Talisman Square has been resurfaced by Discovery as promised and we will be enquiring as to its redecoration

After much correspondence the Water Ball feature in Abbey End is working and the Planters next to Forrest are in position and improving as they settle in.

Councillor Michael F Coker
